### LETTER OF RECOMMENDATION

It is my immense pleasure to recommend the candidate of P Pavan Kumar for admission to the M.S program he is looking for. He studied 4 different subjects under me, which include Digital Communication, Telecommunication Switching, Analog Communication, Signals and Systems during his bachelor's degree in Electronics and Communication Engineering at Sree Vidyanikethan College of Engineering, Tirupati. He has an inquisitive mind and is always curious to learn new things. I have been very much impressed by his logical and critical thinking skills since the very first day of our class together.

Along With his subject teacher, I was also assisting his major project. I got to know of his incredible research skills, and this is something that I can assert for him. His presentation skills are on point, too, and so, he is a confident orator. He gravitates to the highly relevant aspects of his life, and this is something that can work wonders for him in his lifetime.

He is not only an amazing student but also a remarkable leader. During his college he had organized several functions, events and managed everything perfectly. He displayed marvelous leadership skills, communication skills and organizational skills during his term as the coordinator for different events. he has excellent team working skills.

I have absolutely no reservations for recommending P Pavan Kumar for admission to the M.S program at your university. He is technically sound, has great analytical skills, communication skills, organizational skills, critical thinking skills and he will be an asset to your university. Please don't hesitate to contact me in case of any additional questions.
